

SUDIPTA SIKDER

Cybersecurity Undergraduate | SOC, Networking & Systems Development
+60 11-2886 4183 · sikdersudipta6@gmail.com · Bukit Jalil, Kuala Lumpur, Malaysia · LinkedIn

EDUCATION

B.Sc. (Hons) in Cybersecurity, Asia Pacific University, Malaysia | 2024–2027 (Expected), Year 2 Sem 2
HSC (Science), Govt. Hazi Muhammad Mohsin College, Bangladesh | GPA 5.00/5.00, top of cohort (Completed)

TECHNICAL SKILLS

Security & SOC: Threat Detection, Incident Response, Vulnerability Assessment, SOC Operations, Digital Forensics & Packet Analysis, Mobile App Security (OWASP Mobile Top 10), NIST CSF & CIS Controls
Networking: TCP/IP, OSPF Routing, VLAN & Inter-VLAN Routing, DHCP, LAN/WAN Design, Switching & Routing, Ping/Traceroute Diagnostics
Systems & Administration: Linux (Kali, Rocky Linux, Termux), Windows, Mail Server Administration (Postfix, SMTP, TLS/SSL), Firewall Configuration
Programming & Development: Python, Java, JavaFX, Kotlin (Android, MVVM), C# / ASP.NET Core MVC, ADO.NET, SQL Server, HTML5, CSS3, C++, OOP
Tools: Nmap, Wireshark, Metasploit, Burp Suite Professional, MobSF, JADX-GUI, Cisco Packet Tracer, Termux, TryHackMe

PROJECTS

Cybersecurity & Networking

Virtual SOC & Home Lab Environment | *Personal Project — Ongoing*
• Built a virtual SOC to monitor simulated traffic, with automated threat-detection alerts and incident-response playbooks

Security Research & Incident Analysis | *Coursework — Implementation of Secure Systems*
• Simulated a data-exfiltration attack in Wireshark and wrote an incident report mapped to NIST CSF and CIS Controls
• Assessed 3 Malaysian BNPL apps against the OWASP Mobile Top 10 using MobSF, JADX-GUI, and Burp Suite Professional

Enterprise Network Design — LAN/WAN & Routing | *Group Assignment*
• Owned the routing/WAN component: configured OSPF, inter-VLAN routing, and DHCP in Cisco Packet Tracer; verified with ping/traceroute

Mail Server Deployment — Postfix on Rocky Linux | *Individual Project*
• Deployed and hardened a Postfix mail server — SMTP, virtual mailboxes, TLS/SSL encryption, and firewall rules

Software Development

LearnHub — ASP.NET Core MVC Learning Management System | *Group Project*
• Built the MVC/ADO.NET/SQL Server foundation, plus authentication — BCrypt hashing, cookie-based login, role-based access control

Cholo — Motorcycle Ride-Sharing App | *Personal Project — In Development, ~30%*
• Native Android app (Kotlin, MVVM, StateFlow) with live GPS, real-time speed, and ride start/stop control, verified on emulator

Marketplace App for Bangladeshi Sellers & Buyers | *Group Project — Backend & Payments, Roadmap Complete*
• Own the backend/payment workstream; roadmap complete and payment rails scoped — bKash, Nagad, Visa, banking — ahead of implementation

CERTIFICATIONS

Foundations of Cybersecurity (Google/Coursera, 2026) · CCNA: Introduction to Networks, Switching & Routing Essentials, and Enterprise Networking & Security (Cisco, In Progress)

INTERNSHIP AVAILABILITY

4-Month Internship | Available Immediately | Through mid-November 2026 | Full-Time
